

# Database Systems, ITU, Fall 2006

Esben Rune Hansen

## Exercises for the 10. of October

- Download the program from <http://www.itu.dk/people/pagh/DBSE06/javaprogram.zip>.
- Edit line 17 in the file `dbTest.java`: replace `<your db user name>` with your database user name. Note that “@studora” is **not** a part of your username
- Replace `<your db password>` with your database password
- Compile `dbAccess.java` and `dbTest.java` run `dbTest.java`. This can be done simply by running the file `run.bat`
- Run the program and try to manipulate on the existing database through the program
  - Implement deletion in file `dbTest.java`
  - Implement insertion in file `dbTest.java`
