

Introduction to Databases, ITU, Fall 2004

Rasmus Pagh

October 7, 2004

Exercises on October 15

You are unlikely to be able to do all the exercises in two hours. Therefore you are encouraged to prepare at home, and use the exercises for those parts you find difficult.

1. GUW 6.3.2 a), b), c), d) on p. 275. Enter the sample data in Oracle (can be copied and pasted from the files at www.itu.dk/people/pagh/IDB04/data/), and test your queries.
2. GUW 6.3.1. b) + c). Enter the sample data in Oracle and run your **four** queries.
3. GUW 8.7.2 on p. 421. Try out your answer in Oracle with the SELECT privilege on the Movie relation, replacing A, B, C and D with real user names (i.e., four students should do this together).
4. GUW 6.3.9 and 6.3.10 on p. 276. Test your query on the sample data.
5. GUW 8.7.4 on p. 421. Try out your answer in Oracle together with another student.

To be handed in no later than October 22, 1 PM:

Questions 2.a and 2.c from the exam, January 2004, available on the course home page under “useful links”, or directly at: <http://www.itu.dk/people/pagh/IDB04/exam.pdf>

As always, your hand-in must be completed individually.
