Based in Sweden. Lots of robotic stuff and sensors. (English)

<http://www.lawicel.se>

Electrokit

Malmö based company. Electronics and circuits

<http://www.electrokit.se>

Wiki's and other resources

K3 Prototype laboratory

<http://webzone.k3.mah.se/projects/lab>

SensorWiki

Canadian site with information about different sensors.

<http://www.sensorwiki.org/>

Projects, artists and more

Two artists working with interactive installations.

<http://www.hehe.org>

Make a midi synth with Arduino!

<http://todbot.com/blog/2006/10/29/spooky-arduino-projects-4-and-musical-arduino/>

Manufacturers

Matsui Color

Interactive paint.

http://www.matsui-color.com/chromicolor_ink/

Robotic chair

Project displayed at Ars Electronica 2006.

Specific info per group

Group 1

<http://www.lawicel.se> RFID

<http://www.aimglobal.org/technologies/rfid/> RFID info

<http://www.metromadrid.es/> Stations with identity

Group 3

Check out sensors like piezo to sense when it's been hit or maltreated.

Pressure sensors and other sensors as well.

Thermo transfer, matrix or label printers – search at google... could be nice

Group 4

Google interactive museum guides or similar (should be lots of info)

Group 5

http://www.matsui-color.com/chromicolor_ink/

Group 6

<http://www.teknikmagasinet.se/> Here you can find walkie-talkie. Check in denmark.

<http://www.instructables.com/id/EPXHUM1CLNEXCFDNIP?ALLSTEPS>

Group 8

Interactive floor.
